

MICROELEMENTS

BORAMIDE

CE FERTILIZER
BORON ETHANOLAMINE

COMPOSITION

BORON (B) water soluble: 8,5%

AUTHORIZED IN ORGANIC FARMING

FEATURES

BORAMIDE is a formula where boron is bound to an organic amine. In this form, boron becomes more assimilable and less toxic in case of overdose. The liquid formulation allows a more precise dosage.

BORAMIDE is particularly suitable to prevent and to treat physiopathologies caused by the deficiencies of boron, as: heart rot in beet, floral abortion, phloem necrosis of the olive tree.

In general boron deficiencies cause poor fruit-setting, low content of sugar and apex-marginal necrosis.

DOSES AND USE PATTERNS

We recommend to use this product in pre-flowering and after the fruit-setting.

FOLIAR TREATMENTS:

Fruit picking: 1-1,5 kg per hectare, Viticulture: 0,8-1,5 kg per hectare, Herbaceous ornamental plants: 0,5-0,7 kg per hectare, Woody ornamental plants and shrubs: 1 kg per hectare.

Horticulture: 1-1,2 kg per hectare.

PACKING: 1 KG BOTTLES - BOXES OF 20 PIECES, 6 KG CANS - BOXES OF 4 PIECES,
12 KG CANS.
