

LIQUID FERTILIZERS

A-TIOSOL

LIQUID NITROGENOUS FERTILIZERS Solution of ammonium thiosulphate

COMPOSITION

TOTAL AVAILABLE AMMONIACAL NITROGEN (N): 12%
SULFUR TRIOXIDE (SO₃): 54,3%

FEATURES

A-TIOSOL is based on ammonium thiosulphate, a synthetic compound with a high liquid SO₃ ratio. For its unique formulation, the product is particularly useful in the following cases:

- to reduce losses of nitrogen up to 50%
- to increase the availability of phosphorus in the soil
- for its caustic action it can be used to limit the proliferation of saprophytic fungi and to sterilize flowers during the flowering period.

DOSES AND USE PATTERNS

FOLIAR TREATMENTS:

Fruit picking: to limit excessive blooms: 0,8-1,2 kg depending on the humidity, the temperature and the cultivation. It should be used without the addition of other formulations.

Close to the leaf fall, used as a nutrient, thanks to its caustic action to combat microbial forms: 1,2-1,8 kg per hectare.

ROOT TREATMENTS:

10-12 kg per 1000 m²

PACKING: 6 AND 12 KG CANS.
