FEATURES

ORGAFLUID N is an organic NK fertilizer in liquid form studied for fertigation.

The nutrients are immediately absorbed and used, thus it is possible to treat crops already in force.

ORGAFLUID N helps to reduce the salinity of the soil, becoming an essential product when it is too high.

The organic component of ORGAFLUID N contains a full range of proteins, polysaccharides, microelements and natural auxins that reinforce the stimulating and nutritious action of the product.
