

ORGANIC AND ORGANO-MINERAL

RIVITAL NEW

FLUID ORGANIC NITROGENOUS FERTILIZER MIXTURE OF FULVIC ACIDS AND LAEVOROTATORY AMINO ACIDS

COMPOSITION

TOTAL AVAILABLE ORGANIC NITROGEN (N): 3%
Enriched with fulvic acids produced in Nord-America

Organic fertilizers: for at least 21 days after the application it is forbidden to feed livestock with pasture grasses, or distributed after harvest

FEATURES

RIVITAL NEW is a product based on amino acids and fulvic acids, with a high nutrient value, that stimulates and protects the plants. RIVITAL NEW is composed by natural growth hormones that work directly on the metabolism of the plant. It operates as a biochemical activator during the development of all species.

The treatment is recommended whenever the plant is weaker: in case of frost, transplant, excessive soil compaction, root asphyxia and pesticides treatments that might block the plant chemistry. The active substances contained in RIVITAL NEW work directly on the cells, they stimulate the natural auxins and promote the production of enzymes.

It brings to plants a higher vegetative impulse that allows to resist to the stasis periods.

It is also available SPECIAL RIVITAL CARCIOFO with the addition of a fraction of ethanolamine borate.

DOSES AND USE PATTERNS

FERTIGATION: 1-1,5 kg per 1000 m²

FOLIAR TREATMENTS: 0,8-1,2 kg per hectare

Treat every 15-20 days.

PACKING: 1 KG BOTTLES - BOXES OF 20 PIECES, 5-10 KG CANS.
