

## **GRANULAR FERTILIZERS**

# **MAGNI-FER**

**CE FERTILIZER - SALT OF IRON  
(Sulphate) with magnesium**

### **COMPOSITION**

IRON (Fe) water soluble: 12%  
MAGNESIUM OXIDE (MgO) water soluble: 4%  
SULFUR TRIOXIDE (SO<sub>3</sub>) water soluble: 36%

AUTHORIZED IN ORGANIC FARMING

### **FEATURES**

MAGNI-FER is a granular fertilizer obtained by reaction, in which each granule is connected to iron and magnesium and traces of zinc and manganese.

The product is used to prevent the iron chlorosis, to obtain an acid reaction in the soil thanks to the fraction of sulfur as SO<sub>3</sub> and to distribute magnesium.

### **DOSES AND USE PATTERNS**

Treat directly the soil with 5-7 quintals of product per hectare.  
The product can be mixed with other granular fertilizers.

PACKING: 35 KG BAGS ON PALLETS OF 1680 KG.
