

## **FOLIAR FERTILIZERS**

# **EVENGADO**

## **SIMPLE MINERAL FERTILIZER**

### **microelements**

## **COMPOSITION**

TOTAL AVAILABLE NITROGEN (N) 12% Ammoniacal 2%, Ureic 10%

BORON (B) water soluble: 1%

COPPER (Cu) water soluble chelated with EDTA: 1,5%

IRON (Fe) water soluble chelated with EDTA: 4%

MOLYBDENUM (Mo) water soluble: 0,5%

ZINC (Zn) water soluble chelated with EDTA: 2%

pH range that provides stability to the chelated fraction: 3-9

## **FEATURES**

EVENGADO is a product studied to prevent and combat the deficiencies of many microelements, which are involved in photosynthesis, in cell replication, in sugar synthesis and in metabolism of nitrogenous molecules.

Being active both during the vegetative growth and during the whole production cycle, EVENGADO can be used for several treatments.

It can be employed during the formation of vegetative biomass to revive the colour of the leaves, as a growth promoter of the fruits or before dormancy in winter to stabilize the reserve substances of the bud.

## **DOSES AND USE PATTERNS**

### **FOLIAR TREATMENTS:**

Fruit picking and woody plants in general: 1-1,5 kg per hectare

Herbaceous plants (horticulture, etc.): 0,8-1,2 kg per hectare

**PACKING: 1 KG ALUMINIUM BAGS-BOXES OF 20 PIECES.**
