

MICROELEMENTS

AGRUMIN S

**CE FERTILIZER - Mixture of microelements
Boron (B), Copper (Cu), Manganese (Mn), Zinc (Zn)
with Magnesium**

COMPOSITION

BORON (B) water soluble: 0,2%
COPPER (Cu) water soluble: 0,5%
MANGANESE (Mn) water soluble: 10%
ZINC (Zn) water soluble: 8%
MAGNESIUM OXIDE (MgO) water soluble: 5%

AUTHORIZES IN ORGANIC FARMING

FEATURES

AGRUMIN L is a micronutrient association with a purposely studied ratio in order to prevent and control micronutrient deficiencies of orchards and especially of citrus trees. The negative consequences of Zinc and Magnesium deficiencies are well-known in citrus plantations: the production is usually very poor, with fruits of small size, with a thick peel and a insipid pulp. The symptoms of these deficiencies are: smaller leaves, with yellowing, shoots with shorter internodes, shed of the leaves. It is therefore indispensable to bring all the basic micronutrients through foliar applications (in the form of soluble and readily assimilable salts), catalyzing the processes of oxide-reduction, of chlorophyll formation and synthesis of growth regulator of the plant and fruit.

DOSES AND USE PATTERNS

FOLIAR TREATMENTS:

Fruit picking: 1,5-1,8 kg per hectare
Viticulture: 1-1,5 kg per hectare
Horticulture: 0,8-1,0 kg per hectare
Ornamental plants: 0,6-1,0 kg per hectare

PACKING: 2,5 KG BAGS - BOXES OF 8 PIECES, 10 KG BAGS.
