

ORGANIC AND ORGANO-MINERAL

EMOFORT P.S.

ORGANO-MINERAL NP 14.9 FERTILIZER

COMPOSITION

TOTAL AVAILABLE NITROGEN (N): 14%, Organic (N): 10,2%, Ammoniacal (N): 3,8%

PHOSPHORUS PENTOXIDE (P_2O_5) water soluble: 9%

ORGANIC CARBON (C) of biological origin: 36%

Mineral fertilizers: diammonium phosphate 21.53

Organic matter: dried blood, seaweed extract

Organic fertilizers: for at least 21 days after the application it is forbidden to feed livestock with pasture grasses, or distributed after harvest

FEATURES

EMOFORT is a product based on water soluble blood. Its nourishing action comes from the presence of vitamins and growth hormones (cytokinins, auxins) macro and microelements deriving from the seaweed *Ascophyllum Nodosum*.

EMOFORT combines in one product the nutritional activity of the blood with the biostimulating one of the seaweeds. It increases the development of the roots, it improves the production both in quantity and in quality and it makes plants healthier and more resistant to unfavorable conditions, as sunburn.

DOSES AND USE PATTERNS

We recommend to dissolve the product slowly and shaking it. Do not exceed 7-10 kg per 100 liters of water (not cold preferably). If necessary add 10-20 grams of ANTISCHIUMA SUNCHEMICAL. Do not mix with products with an acid pH (as phosphoric acid).

FERTIGATION:

Fruit picking: 10-30 grams per plant or 3-5 kg per 1000 m².

Horticulture: 3-5 kg per 1000 m².

After the crisis of the transplantation, treat the first time with 10 kg of product per hectare, then treat regularly every 20 days with 30-40 kg of product per hectare for the whole crop cycle.

FOLIAR TREATMENTS:

The dose recommended is 3 kg per hectare with the use of weeding bars. Treat every 20-30 days.

PACKING: 10 KG BUCKETS.
