

FERTILIZERS TREATMENTS IN CASE OF EMERGENCY

ERGOPLANT SPECIAL

ORGANIC LIQUID NITROGENOUS FERTILIZER

Fluid fleshing

COMPOSITION

TOTAL AVAILABLE ORGANIC NITROGEN (N) water soluble: 3%

CARBON (C) organic: 10%

AUTHORIZED IN ORGANIC FARMING

Organic fertilizers: for at least 21 days after the application it is forbidden to feed livestock with pasture grasses, or distributed after harvest

FEATURES

ERGOPLANT SPECIAL is studied to increase the productivity of orchards. It is a polyvalent product formed from essential molecules for the cell multiplication in all the phases of the life of the plant. It is particularly suitable after transplants and pre-harvest to stabilize the sugars and polyphenols. It increases the resistance to the manipulation of the fruits and the duration of storage. It can be used after parasite attacks, hailstorms, and environmental stresses caused by both by the heat and cold. It increases the root absorption bringing nutrients rapidly assimilable by the plants.

DOSES AND USE PATTERNS

FERTIGATION:

With normal water, not necessarily acidified:

3-5 kg per 1000 m², minimum 2-3 treatments per week.

It can be used on all crops.

PACKING: 25 KG CANS
