## **MISCELLANEOUS PRODUCTS**

# **CRIOSTOP**

# FE FERTILIZER NPK low content of chlorine

# **COMPOSITION**

TOTAL AVAILABLE UREIC NITROGEN (N): 6% PHOSPHORUS PENTOXIDE (P<sub>2</sub>O<sub>5</sub>): 5% POTASSIUM OXIDE (K<sub>2</sub>O): 5%

## **FEATURES**

This product is studied to prevent the frosts in spring, provided that it is applied when the plant is dry, at least 2 hours before the hypothetical decrease of the temperature.

The effect lasts about 36 hours.

It can be applied even on open flowers, provided they do not exceed the doses of 10-15 kg per hectare with a foliar treatment.

In spring and summer it is an important catalyst of the cell metabolic processes and a destroyer of bioaccumulation of the toxins of pesticides.

We recommend to use the product alone even on weak plants.

## **DOSES AND USE PATTERNS**

**FOLIAR TREATMENT:** 

To reduce damage caused by frost: Woody plants: 10-15 kg per hectare

Herbaceous plants (horticulture and ornamental plants): 5-7 kg per hectare

As a nutrient, biostimulate and detoxifying:

Woody plants: 3 kg per hectare

Herbaceous plants: 1-1,2 kg per hectare

PACKING: 5-10 KG CANS.
